DINESH MOHAN

System & Database Administrator | Security & SOC Engineering

Chennai, India • dinesh190704@gmail.com
linkedin.com/in/dinesh-mohan-894574227 • github.com/dinesh-190704

Hands-on **System & Database Administrator** with 1.5+ years of operational experience owning 24/7 mission-critical healthcare server environments, HIMS/EMR application stacks, MySQL database clusters, and AWS infrastructure. Sole deployer of **Wazuh SIEM** with custom decoders and File Integrity Monitoring (FIM). **Certified ISO/IEC 27001:2022 Internal Auditor** and active **CISSP Aspirant** advancing into Defensive Security, Detection Engineering, and Cloud Infrastructure Security roles.

PROFESSIONAL EXPERIENCE

System & Database Administrator — Kranium Healthcare System
Jan 2026 – Present | Chennai, India

- **Full Infrastructure Ownership:** Sole IT engineer managing end-to-end server provisioning, application runtime deployment, and database administration for client hospital servers across physical and AWS EC2/VPC environments.
- **SIEM & Threat Detection:** Solely architected and deployed enterprise **Wazuh SIEM** on AWS; configured centralized syslog aggregation, custom log decoders, real-time alerting for authentication anomalies, and File Integrity Monitoring (FIM).
- **High Availability & Clustering:** Configured Apache High Availability (HA) and MySQL Master-Slave replication clusters; automated daily multi-tier backup validation with offsite redundancy and disaster recovery drills.
- **Remote Hospital Operations:** Provided 24/7 remote incident troubleshooting for client hospitals across India and East Africa; executed live hypervisor migration (ESXi to Proxmox VE) for a 200+ bed hospital with zero data loss in <30 min downtime.
- **ISO 27001 Audits & Compliance:** Successfully led 2 internal audits and coordinated preparation for a formal external CISO surveillance audit under ISO/IEC 27001:2022; authored access control matrices and security incident runbooks.
- **Automated Vulnerability Remediation:** Conducted infrastructure VAPT with Nmap and Wireshark; deployed **Action1** platform for centralized CVSS-based vulnerability prioritization and scheduled patch management across all endpoints.

System Administrator Intern — Kranium Healthcare System
Jul 2025 – Dec 2025 | Chennai, India

- Provisioned virtual machines (VMware ESXi, Proxmox VE), configured network interfaces, DNS, DHCP, and host firewalls (UFW/IPTables).
- Monitored database transaction logs, assisted in MySQL database query optimizations, and resolved IT hardware/network support tickets.
- Promoted to sole full-time System & Database Administrator following demonstrated technical ownership and incident management skills.

KEY ENGINEERING PROJECTS

Centralized Wazuh SIEM & Zabbix Monitoring Hub
Engineered multi-node Wazuh SIEM cluster on AWS EC2 ingesting telemetry from distributed servers. Created custom rules for brute-force attacks and privilege escalation; paired with Zabbix for 24/7 host metrics.

International Hospital Production Live Migration
Remotely migrated core HIMS/EMR application and multi-gigabyte MySQL database from VMware ESXi to Proxmox VE during scheduled off-peak window with zero data loss and under 30 minutes total downtime.

ISO/IEC 27001:2022 ISMS & CISO Audit Program
Established Information Security Management System controls across corporate and hospital environments, implementing least-privilege Active Directory permissions, asset registers, and audit-ready compliance documentation.

Action1 Unified Patch Management & VAPT Pipeline
Audited perimeter and internal attack surfaces using Nmap and Wireshark; implemented Action1 cloud endpoint management to automate zero-disruption patch deployment for high/critical CVSS vulnerabilities.

TECHNICAL COMPETENCIES

Defensive Security:	Wazuh SIEM, Custom Decoders, File Integrity Monitoring (FIM), Threat Hunting, CIS Benchmarking, Linux/Windows Hardening, Action1 Patching, VAPT (Nmap, Wireshark), ISO 27001 ISMS
Systems & Cloud:	Debian, Ubuntu, Windows Server, AWS (IAM, EC2, S3, VPC), Proxmox VE, VMware ESXi & Workstation, Apache HA, SSH Hardening, UFW, IPTables, Bash Scripting
Databases & Network:	MySQL Administration, Master-Slave Replication, Automated Backup Pipelines, MongoDB Basics, Active Directory, DNS, DHCP, TCP/IP Routing & Troubleshooting

CERTIFICATIONS & ACCREDITATIONS

ISO/IEC 27001:2022 Internal Auditor
Beacon Desyne / Bureau Veritas (Reg: BD/ISMS-IA/26/186)

ISC2 Candidate • CISSP Aspirant
Active study across 8 CISSP CBK domains

Oracle Cloud Foundations Associate
Oracle University (Tenancy, IAM, Networking)

Cisco IT Support Specialist
Cisco Networking Academy (TCP/IP & Diagnostics)

MongoDB Database Basics
MongoDB University (Data Modeling & Queries)

Peer-Reviewed Journal Publication
IJARETY (Healthcare Information System Architectures)

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology — Jaya Engineering College, Anna University, Chennai
Graduated with 85% Aggregate (2021 – 2025)
